New Year, New Technology: Purple Platypus Debuts Multi-Material, Multi-Color 3D Printer

Purple Platypus acquires Stratasys' recently released multi-color, multi-material 3D printer to their Showroom

Headquarters

IRVINE, California—Purple Platypus, Inc. announced the acquisition of Stratasys' latest technology, the Connex3 color 3D printer, which features multi-material and multi-color capabilities.

Among their large showroom of over 13 3D printers and milling machines, the recent addition of the Stratasys Connex3 will increase their service bureau production, as well as allow current and prospective 3D printer users to better understand Stratasys' latest advancements.

The Connex3 provides users with the ability to select multiple colors while utilizing multiple materials in a single print job. The Connex3 print colors include rich, vivid opaque, and stained-glass-like translucent all while holding different materials such as rubber-like, rigid, digital materials among many others. For more information regarding the specifications of the Connex3, please download the Design Series [brochure](#).

Visitors and Guests are invited to attend this month's Open House on January 20, 2015 from 9:00AM – 2:00PM PST for the unveiling of the state of the art Stratasys 3D Printer where we will conduct a live demonstration and discuss specifications of the Connex3. Please visit our [website](#) to register for this event.

About Purple Platypus

Purple Platypus, located in Orange County Southern California, is a preferred distributor of Stratasys 3D Printers which features PolyJet and FDM technologies. With an extensive product line and a committed, knowledgeable team of industry experts, Purple Platypus is able to provide businesses the technology needed to bring their innovative designs and ideas to life. Purple Platypus also specializes in Roland benchtop milling machines and SpaceClaim 3D Direct Modeling Software.
